Plug and Play

These displays have two separate built in HD Android media players and require no additional hardware or software. Load your pictures and videos onto a USB stick and insert it into one of the USB ports, this copies the files to the screen's internal memory. Once you remove the USB stick your pictures and videos will play in a continuous loop. It couldn't be simpler to get your content onto the screens.

Android Media Player

With a built in Android media players, these screens are more easily updateable and faster than ever before. The Android PC boards makes it easy to upgrade your screen to be networked and also allows you to run 3rd party Digital Signage software.

Free Scheduling Software

To get the most out of the screen, advanced users can use our free scheduling software that allows you to display different content at certain times of the day. You can also set image duration and transition effects using this software.

Eco Friendly Power Timer

This allows for reduced power usage by automatically powering off in hours that the displays are not required. You can set daily, or weekly, On/Off times for your displays.

24/7 Commercial Use

Commercial grade panels, with a lifespan of 50,000 hours, and high quality components ensure that these displays can be in constant use 24/7. Tablet-like styling is achieved thanks to their tempered glass front and robust steel enclosure.

LED Backlight Technology

The LED backlights built into these displays ensure improved brightness and contrast as well as drastically improving their lifespan and reducing their power consumption by around 30%. This form of light technology is mercury free; safeguarding this screen's eco friendliness.

Make Twice The Impact

This product exclusively features two screens that allow for the widest possible audience to see your content. With additional one sided or doubled sided touch screen upgrades you will never fail to leave an impression.

Internal Locker

If you need to run the screen from an external source, like a PC, you can do so by using the HDMI or VGA inputs. There is a space to fit a small PC inside the lockable compartment.
