

iSign

The display frame has evolved with the introduction of the sophisticated iSign system.

A sophisticated contemporary look

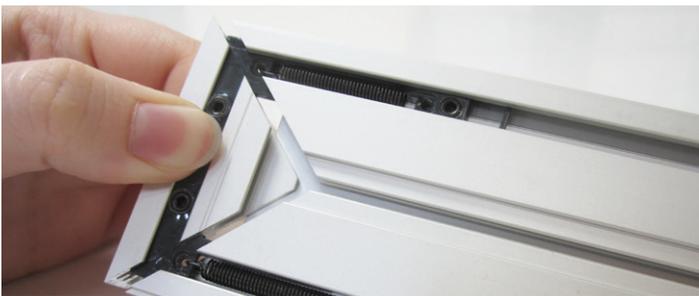

iSign is an elegant and flexible display frame and signage system

A contemporary, slim and sophisticated system for the display of signs and notices. iSign is constructed from a silver anodised aluminium profile with an anti-reflective acrylic cover. Wall mounted frames are available in a wide range of sizes, including A-series paper sizes from A6 to A1. Featuring a 9mm profile depth, each wall mounted display has a discreet locking device to ensure the systems tamper-proof.

Architectural design

This is where form follows function with a simple, user-friendly feature. The frames open with an ingenious, patented, spring mechanism that's cleverly concealed on the reverse of each unit.

Multifunctional non-illuminated frames

Projecting signs, hanging signs and a desk stand complete the iSign range and are available in set dimensions to create flexible, coordinated, wayfinding and interior branding systems.

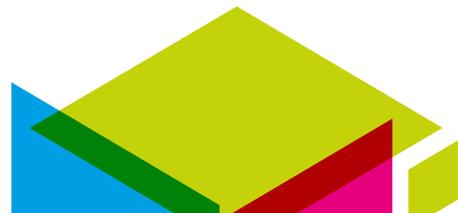

The seamless looking frames have a flush-face finish which, as well as delivering a contemporary design, eliminates the collection of dust along the frame's edges.

Create coordinated systems

With design consistency, the system can be used to create fully complimentary systems for offices, hospitals, museums and educational establishments alongside retail and hospitality environments.

Key features

- Stylish, sleek and beautifully engineered
- Opens with a patented spring mechanism
- Includes A-series wall mounted frame sizes, A6 - A1
- Tamper-proof wall mounted frames
- Consistent system in silver anodised aluminium

1. The anti-reflective acrylic cover is flush with the top of the aluminium frame giving the iSign range a sleek look.

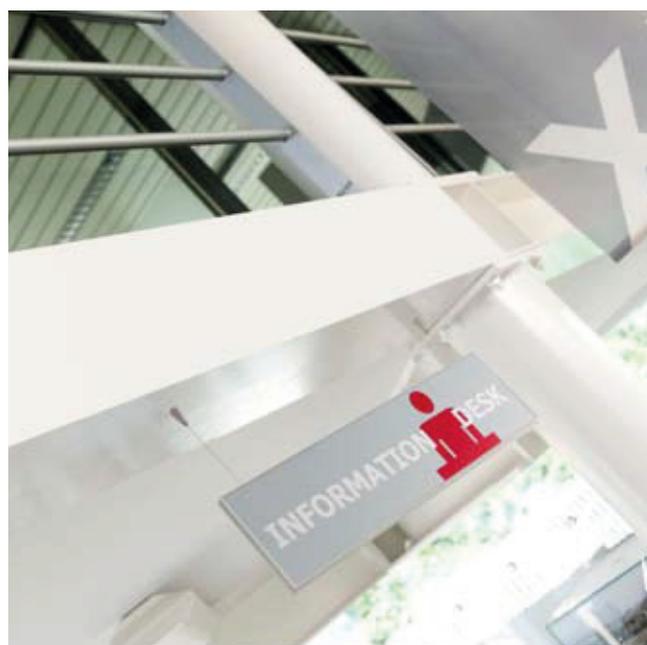

4. To prevent unauthorised changing of inserts and ensure iSign is tamper-proof, the frame is equipped with a locking function.

2. Inserts can be replaced easily after removing the acrylic cover with the help of an ingenious, patented, spring mechanism.

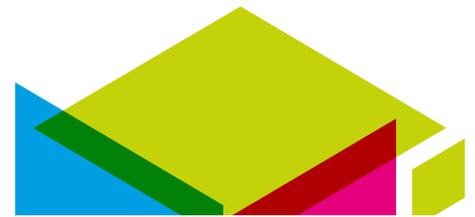

3. To wall mount an iSign frame, double-sided tape or adjustable wall mount buttons can be used.

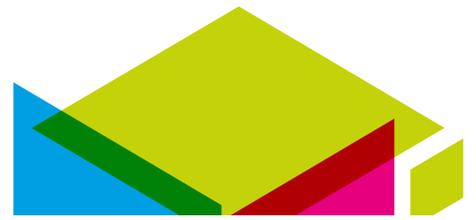

Price List - iSign
